Editing Content in the Sitecore Experience Editor

**Enhancing the CMS user
experience**

Using placeholder settings

Setting up branch templates

**Implementing a repeater
pattern**

Let's Begin

Reviewing Experience Editor and the Sitecore Field Renderer

Control editing fields using the Sitecore Field Renderer

Explicitly enable editing using
`DisableWebEdit = false`

Check for `Sitecore.Context.PageMode
.IsExperienceEditor`

Working with Branch Presets and Associated Content

Branch Presets set the proper Datasources

Set the Associated Content Datasource location and template

Enter multiple Datasource locations in a pipe-delimited list
