Creating Sitecore Helix Renderings

**Working with
Sitecore Field
Types**

**Configuring
Datasources**

**Using Insert
Options**

Let's Begin

Rendering Image Fields

Render images using
`@Html.Sitecore().Field
(Templates.TwoImage.Fields.Image1)`

Add css classes using
`@Html.Sitecore().Field
(Templates.TwoImage.Fields.Image1, new
{ @class = "img-fluid rounded-soft" })`

Configuring a Data Source and Insert Options

Datasources allow us to reuse the same component

Insert Options guide the user

Creating Sitecore Helix Renderings Using Simple Field Types

Rendered fields by field ID

Worked with Simple field types

**Improved CMS user experience using
datasources and insert options**
